MEMORANDUM FOR: SUPPLY PRC MEMBERS

SUBJECT: Approved DLMS Change 49B, Revision to DLMS Supplements (DS)
517M, Material Obligation Validation (MOV) (Supply)

This change to the DoD 4000.25-M, Defense Logistics Management System (DLMS), supercedes and incorporates changes provided under ADC 49 and 49A. This change is provided to include an additional administrative change to the DS 517M. Portions of this change require a corresponding change to the Federal IC prior to implementation. The DS will be posted to the DLMSO web site (<http://www.dla.mil/j-6/dlms0/ICs/Default.htm>) immediately upon coordination/approval from the DoD Electronic Data Interchange Standards Management Committee (EDISMC) and Logistics Functional Working.

Addressees may direct questions to the DLMSO points of contact, Ms. Ellen Hilert, Co-Chair, Supply Process Review Committee, 703-767-0676, DSN 427-0676, or email: ellen_hilert@hq.dla.mil or Ms. Vermella Saváge, DoD MILSTRIP System Administrator, 703-767-0674, DSN 427-0674, or e-mail: vermella_savage@hq.dla.mil. Others must contact their Service or Agency designated representative.

JAMES A. JOHNSON
Director
Defense Logistics Management
Standards Office

Approved Change 49B
Revision to DLMS Supplement (DS)
517M, Material Obligation Validation (MOV)

1. ORIGINATOR:

a. Sponsor: Supply Process Review Committee, Ellen Hilert, Co-Chair, DLA J-673, Defense Logistics Management Standards Office (DLMSO), 703-767-0676 (DSN 427), ellen_hilert@hq.dla.mil

2. FUNCTIONAL AREA: Supply

3. REQUESTED CHANGE:

a. Title: Revision to DS 517M, MOV

b. Description of Change: ADC 49/49A opened the unit of issue data element, provided for correct placement of the associated note, and opened the LQ qualifier for Document Identifier Code in the detail table. This revision opens the LM/LQ loop in the header table for identification of the Document Identifier Code during DLSS/DLMS transition. (Item 3 is new to ADC 49B.)

c. Procedures: Revise DLMS Supplements as indicated.

#	Location	Revision	Reason	Federal IC
1	2/QTY03/10	<p><u>Open data element:</u> C001 Composite Unit of Measure</p> <p>Notes are associated with data element 355, Unit or Basis for Measurement Code: <u>Add Federal Note:</u> Use to identify the unit of issue for the material validated. <u>Add DLMS Note:</u> DLMS users see the Unit of Issue and Purchase Unit Conversion Table for available codes.</p>	Reinsertion of previously streamlined data to support DLSS-DLMS conversion. The indicated placement of the note is consistent with other DLMS DSs.	Open data element. Requires a Federal IC change prior to DS update.
2	2/LQ01/80	<p><u>Add qualifier and note:</u> 0 Document Identification Code DLMS Note: 1. The DLSS DI Code is retained in the DLMS to facilitate transaction conversion in a mixed DLSS/DLMS environment. Continued support of the DI Code in a full DLMS environment will be assessed at a future date. 2. Future streamlined data; see introductory DLMS note 3c.</p>	This data element was apparently dropped during IC development and is being reinserted. DI Code is necessary to perform the conversion between DLMS and DLSS transactions.	Add data element. Change to Federal IC <u>not</u> required prior to DS update.

3	1/LM/040 1/LQ/050	<u>Open LM/LQ segments.</u> <u>Add qualifier and note:</u> 0 Document Identification Code DLMS Note: 1. The DLSS DI Code is retained in the DLMS to facilitate transaction conversion in a mixed DLSS/DLMS environment. Continued support of the DI Code in a full DLMS environment will be assessed at a future date (Applicable only to DI Code AP8 and AP9). 2. Future streamlined data; see introductory DLMS note 3c.	DI Code is necessary to perform the conversion between DLMS and DLSS transactions. The detail loop cannot be used because the table 2 LM/LQ is inside the QTY loop and the AP9 and AP8 do not have quantities.	Open segments/ data element. Requires a Federal IC change prior to DS update.
---	----------------------	--	--	---

d. Alternatives: None identified.

4. REASON FOR CHANGE: This change is required for successful conversion between the DLSS MOV transaction and the corresponding DLMS implementation. Under the original DLMS concept the unit of issue applicable to the MOV would be resident in both the sender and receiver's systems and transmission was not considered necessary. Current thinking is that the unit of issue must be retained to support conversion and may be retained under the future DLMS. The DI Code is also required for successful conversion of MOV transactions.

5. ADVANTAGES AND DISADVANTAGES:

- a. Advantages:** Supports DLMS implementation.
- b. Disadvantages:** None identified.

6. IMPACT:

- a. Publications.** Corresponding Federal IC.
- b. DAAS DLMS/DLSS conversion maps as applicable.**
